

Nurse Practitioner

(555) 010-0000 · you@example.com · City, ST · linkedin.com/in/your-name

SUMMARY

Board-certified family nurse practitioner with seven years of RN experience and four in primary care, managing a 1,400-patient panel, full prescriptive authority, and chronic-disease programs that hold measurable gains in diabetes and hypertension control.

EXPERIENCE

Family Nurse Practitioner, Community Primary Care Associates 2022 – Present
City, ST

- Manage a 1,400-patient primary-care panel, conducting 22 to 26 visits daily across acute, chronic, and wellness care with autonomous prescribing under state APRN authority.
- Raised the diabetic panel's at-goal A1c rate from 54 to 68 percent over six quarters by tightening titration follow-up and pharmacist co-management.
- Lifted age-appropriate cancer-screening completion by 17 percent through standing-order workflows the clinic adopted practice-wide.
- Diagnose and treat common acute conditions, order and interpret labs and imaging, and refer complex cases with documented clinical reasoning.
- Prescribe and adjust medications including controlled substances under an active DEA registration, with full compliance on the state PDMP database.
- Precept two NP students per year through clinical rotations, signing off competencies and supervising independent visit progression.
- Reduced low-acuity emergency referrals from the panel by 12 percent by expanding same-day visit capacity.

Registered Nurse, Emergency Department, Regional Medical Center 2016 – 2022
City, ST

- Triage and treated high-acuity emergency patients at a 4:1 ratio while completing an MSN-FNP program at night.
- Served as charge nurse on rotating shifts, coordinating bed flow for a 38-bay department during surge volumes.
- Led trauma-bay resuscitations as the primary nurse and documented in Epic to trauma-registry standards.
- Mentored new emergency RNs through a structured competency pathway as a unit-based educator.
- Initiated sepsis bundles within the first hour for at-risk arrivals, contributing to the department's improved time-to-antibiotic metric.
- Sat on the unit practice council and helped rewrite the triage protocol that shortened average door-to-provider time.
