

Phlebotomist

(555) 010-0000 · you@example.com · City, ST · linkedin.com/in/your-name

SUMMARY

Certified phlebotomist with four years across hospital draw stations and a mobile patient service center, completing 60-plus venipunctures a day at a first-stick success rate above 95 percent with a specimen-rejection rate held under 1 percent.

EXPERIENCE

Phlebotomist, Regional Medical Center Laboratory

2022 – Present

City, ST

- Collect 60 to 80 specimens per shift across inpatient draws, the outpatient draw station, and timed and fasting collections.
- Hold a first-stick success rate above 95 percent, including geriatric and oncology patients with difficult or fragile veins.
- Maintain a specimen-rejection rate under 1 percent by following order of draw, correct tube selection, and two-identifier labeling.
- Collect blood cultures with sterile technique that kept the unit's contamination rate below the lab's 3 percent benchmark.
- Process and centrifuge specimens, then enter and route them through the laboratory information system without batch errors.
- Perform morning ICU and floor draw rounds for up to 40 patients before the 0700 lab cutoff, keeping result turnaround on schedule.

Mobile Phlebotomist, Citywide Diagnostics Patient Service Center

2021 – 2022

City, ST

- Drew specimens at patient homes and assisted-living sites, completing roughly 25 mobile collections a day on a routed schedule.
- Performed pediatric capillary heel sticks and finger sticks using age-appropriate comfort techniques and parent guidance.
- Verified test requisitions, fasting status, and patient identity before each draw to prevent pre-analytical errors.
- Packed and transported specimens within stability windows, logging chain-of-custody for drug-screen collections.
- Handled glucose-tolerance and timed-draw appointments, tracking each interval against the test protocol clock.
- Restocked and maintained the mobile draw kit so every visit carried the full range of tubes and supplies needed.

EDUCATION

Phlebotomy Technician Certificate Program

2020 – 2021

Community Technical College — City, ST

CERTIFICATIONS & LICENSES

Certified Phlebotomy Technician (CPT) · BLS

SKILLS

Venipuncture · Capillary collection · Order of draw · Specimen labeling and ID · Blood-culture technique · Difficult-vein technique · Specimen processing · Laboratory information system · Chain of custody · Patient comfort and communication · Infection control · Time-sensitive collections
